Work Experience

10/2015 – present

Software Developer

JN General Insurance

In my current position, I am focused primarily on enhancing JNGI's premier eCom-merce platform JNGI Online to simplify prospective and existing customers' process for buying insurance online.

During my tenure I have developed/extended several applications across web and desktop which is further detailed below:

Web Portal for JNGI's core insurance application, PURE

Worked as part of a team to develop the internal portal for staff by implementing UI enhancements via validation/conditional logic as well as UI theming.

Bordereaux Written Premium Import Tool

Developed a few features of this import tool to extract data from Excel files while generating data validation error log files.

Web Portal for Insurance Brokers to JNGI

Enhanced an existing application by building a drag/drop file upload UI complete with reporting capabilities for audit purposes. Additionally, worked on automating a previously manual process through an integration of the documents management process to the file upload UI.

JNGI Online

Worked collectively with my team to upgrade the existing infrastructure to allow for a tighter integration between JNGI Online and JNGI's core insurance application, PURE. This upgrade came about through developing a back-end API along with a front-end website for customers to use replete features for customers to safely buy insurance online. Features I worked on includes: account management (onboard- ing, login, reset password, etc), file upload/download UI for submitting documents, camera UI for ID and address proofing, payment gateway implementation complete with a few payment methods and finally automation and integration of the docu- ments management process with upgraded platform.

Admin/Management tool for JNGI Online

Created a companion admin/management tool for internal staff to manage various aspects of JNGI Online without the need for assistance from the IT department. Features include: a toggle for site maintenance with a user defined end time, man- agement if customer accounts, JN Bank payments and policies in the event of errors on JNGI Online.

3/2015 – 10/2015

Freelance Web Developer

Self-Employment

Developed websites for clients for the purposes of providing them with a web presence.

9/2011 – 3/2015

Clerk (Registry, Internal Audit, Mortgage Information)

National Housing Trust

Worked in various departments performing several administrative functions including but not limited to filing, data entry, reporting and customer service.

Education

9/2009 – 7/2011
